OR (95% CI)	0.95(0.76-1.20)	0.99(0.78-1.24)	0.90(0.66-1.25)	0.95(0.69-1.32)	1.06(0.81-1.37)	1.08(0.83-1.40)

Abbreviations: BMI, body mass index; CI, confidence interval; MUFA, monounsaturated fatty acids; OR, odds ratio; PUFA, polyunsaturated fatty acids; SFA, saturated fatty acids; TgAb, antithyroglobulin antibodies; TPOAb, antithyroid peroxidase antibodies.

a: $\ln(x+1)$ transformed value due to zeros existing in log transformation (17, 18).

b: adjusted for race/ethnicity (non-Hispanic white, non-Hispanic black, Mexican Americans, and others), age, BMI, smoking status and urine iodine concentration.

* $P < .05$; ** $P < .01$; *** $P < .001$.
